

# singular audio

## **Tubedrive tech specs:**

THD: 0.2% to 85%

Noise : <95dB below maximum output level at typical settings

Frequency response (triode): 30Hz - 20kHz  $\pm$ 1dB

Frequency response (pentode): 40Hz - 20kHz  $\pm$ 1dB

Max gain (clean): 25dB

Max gain (overdriven): 45dB

Boost switch: +12dB input level

Bypass : relay switched balanced bypass

Tolerance between channels :  $\pm$ 0.5dB at typical settings, tolerance decreases with lower mix setting

Power consumption:

+16v = 95mA (per slot)

- 16v = 90mA (per slot)

Tube complement per slot: 1 x 6J2P (6AS6 pin compatible)

Plate voltage : 230VDC
